PROFESSIONAL SUMMARY

Computer Science student pursuing B.Tech at SRMIST with hands-on full-stack and AI project experience across 30+ builds, and recognized with a "Most Innovative Solution" award at a consulting entrepreneurial pitch for translating a business problem into a technical solution. Skilled in cross-functional collaboration, stakeholder communication, and requirements-driven problem solving, with a strong interest in cloud and Distributed Computing.

EDUCATION

SRM Institute of Science & Technology, Chennai

Aug 2024 – 2028

B.Tech, Computer Science & Engineering; GPA: 4.37 / 5.0

EXPERIENCE

Full Stack Developer Intern — BufferTech (Feb 2024 – Aug 2024)

- Developed production web features using React.js, Firebase, JavaScript & REST APIs, **reducing bounce rate by 80%** and **latency by 20%** through performance and UX optimization.

Creative Designer — 6Pistons (Mar 2025 – Aug 2025)

- Created **automotive infographics for Mercedes-Benz, VinFast, and Audi** at an automotive media platform, translating detailed vehicle specifications into **engaging single-poster visual guides** for auto-expo coverage.

PROJECTS

TODAR 2.0 — Smart Expense Tracker live at: todar.finance.lakshya.uk

- Architected and deployed a finance-management platform that converts fragmented personal spending into structured data, REST-based reporting, and actionable financial insights; used by teens to optimize spending by **up to 45%**.
- Integrated **TensorFlow.js** models for spending prediction, category analysis, and anomaly detection, generating threshold-based alerts to help users identify spending patterns and make data-driven financial decisions.
- Designed the platform as a **financial-literacy tool for students**, translating real transaction data into practical learning around budgeting, spending behavior, and personal finance.

Red Gambit — AI Strategy Gaming Platform live at: redgambit.lakshya.uk

- Designed and deployed a multi-game AI platform spanning Chess, Baduk & Battleship with adaptive-difficulty opponents, applying game-tree search techniques and integrating the KataGo and Stockfish engines to solve for consistent, engine-backed gameplay across skill levels.
- Engineered real-time move visualization, match recovery, and move logging, and implemented three responsive, accessibility-first UI themes to improve usability across user needs.

Lakshya — Interactive Developer Portfolio live at: lakshya.uk

- Built a custom animated, WebP-based portfolio with interactive storytelling, a Developer Arcade featuring three original browser games, a language-skills visualization, and a responsive project showcase.
- Reached over 14K visitors over 20+ countries globally.

LEADERSHIP & CAMPUS INVOLVEMENT

SRMIST

Aug 2024 – Present

- Trainee Lead, Directorate of Alumni Affairs (DAA) — mentored new recruits and coordinated **100+** alumni-engagement events, managing relationships across alumni, faculty, and student stakeholders.
- Associate, Coding Ninjas Club — led editorial, Legals & Drafting team and co-organized technical events
- EMCEE, SRM Directorate of Student Affairs — Hosted and coordinated large-scale student events, engaging audiences of **5,000+ attendees**.

CERTIFICATIONS & ACHIEVEMENTS

- Most Innovative Solution — UCSI Consulting Group Pitch, Kuala Lumpur (Jan 2025); Selected as **1 winning team among 500+ teams and 3,000+ students** for an innovative business-technology solution.
- 1st Runner-Up, SRMIST PBL Department of Foreign Languages 2024 — represented Republic of Korea.
- Semi-Finalist, BITS Hyderabad TechXcelerate Hackathon 2025.

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, Java, HTML, CSS, Bash, TypeScript

Frontend: React.js, Next.js, Tailwind CSS

Backend & APIs: Node.js, Express, SQLite, Firebase, PostgreSQL, Prisma, RESTful APIs, FastAPI

AI / ML: TensorFlow.js, PyTorch, Anomaly Detection, Predictive Modeling, Deep Learning

Cloud, Tools & Methodologies: Power BI, Azure, Git, GitHub, Vercel, Firebase Hosting, Kubernetes
